

Build IA Shape – Web Application Proposal

Client Budget: BDT 40,000

Client Name : Nisith Chakraborty

Date : 7/22/2025

Project Summary

Build IA Shape is an educational and contributor-based web application where users can download and customize IA (Information Architecture) structures in PDF/Word formats. Contributors can upload their completed versions and support the educational content. Here a user can give a quiz and he will get marks according to his quiz. The user can select the quiz of their choice and create their own and there will be a blank PDF file. Super admin can promote any website here if they want. There will be a promotion page for super admin or admin on every page of the website, including the homepage. There will be a super admin on the website who can assign one person as an admin and moderator if he wants.

Technologies Used

Component	Technology
Frontend	React.js + Tailwind CSS + DaisyUI + ShadCN UI
Frontend Language	TypeScript
State Management	Redux Toolkit
Backend	Node.js + Express.js
Database	MongoDB + Mongoose
Authentication	Custom JWT-based Auth (with bcrypt)
File Upload	Multer + Cloudinary
PDF Handler	pdf-lib / PDF.js

Key Features

User Panel

- Layer-wise IA Shape Selection (1st to 7th Layer)
- Free PDF/Word format download
- Contributor File Upload panel
- 30-question section for educational purpose (manual input)
- Multi-form page rendering
- Footer: Logo, About Us, Terms, Contact, Social Links

Super Admin Panel

- Add/Edit/Delete IA Formats
- Approve/Reject Contributors' Files
- Upload new Templates
- View submissions with pagination
- Promote/Demote Users to/from Admin Role
- Super Admin can add Admin and Moderator roles
- Super Admin can promote website-wide announcements or banners

Admin Panel

- Add/Edit/Delete IA Formats
- Approve/Reject Contributors' Files
- Upload new Templates
- View submissions with pagination
- Promote/Demote Users to/from Admin Role
- Super Admin can add Admin and Moderator roles
- Super Admin can promote website-wide announcements or banners

Moderator Panel

- Add/Edit/Delete IA Formats
- View submissions with pagination
- Promote/Demote Users to/from Admin Role
- Super Admin can add Admin and Moderator roles
- Super Admin can promote website-wide announcements or banners

Custom Authentication

- Register/Login with Email & Password
- JWT Token-based secured access
- Admin/User Role Support

Payment Plan

Step	Condition	Amount
Step 1 (Advance)	Before project starts	20% = BDT 8,000
Step 2	After Frontend (React, UI, TypeScript) is complete	40% = BDT 16,000
Step 3	After Backend + DB + Auth + Upload is complete	30% = BDT 12,000
Step 4 (Final)	Upon final handover	10% = BDT 4,000

Total: BDT 40,000

Payment Gateway :

1.Bkash Personal Number : 01775775772

2.Nagad Personal Number : 01775775772

I don't have a bank statement, but I will create one and give it to you. Give me some time.

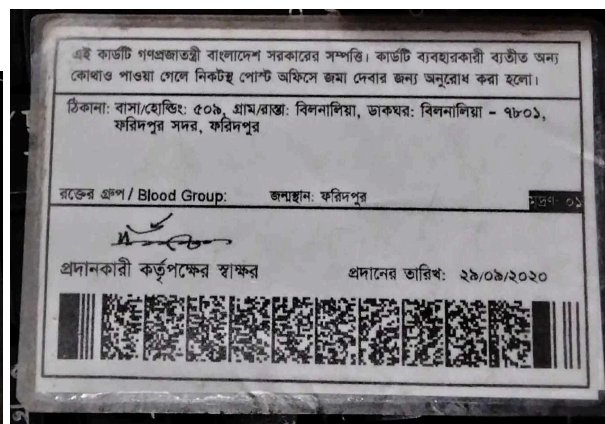

Development Timeline (40 Days)

Task	Duration
UI/UX Design	4 Days
Frontend (React + UI)	7 Days
Backend + DB + Auth	6 Days
Admin Panel & Upload	5 Days
Testing + Final Setup	3 Days
Buffer/Contingency	15 Days

Security Features

- JWT + Refresh Token System
- Password Hashing (bcrypt)
- Route Guard (Admin/User)
- File Type Validation

Developer NID Frontend

Promotion Super admin & Admin

Super Admin Admin can promote any website or picture if he wants.

Website Free Service 1 Year

I will make the website in such a way that there are no bugs or errors, but even then, if a tiger is seen outside within a year, I will immediately solve it for you. If there is any problem with the website within a year, I will solve it for you immediately. If you want to add any functionality, you have to pay.

Lifetime Support

I will give you lifetime support as long as my career in web development lasts. I want to pursue a career in web development in life, now I trust in God. If I ever give up my career, I will be forced to hire you as another developer. I will add everything you want to add to Lifetime, but you have to get it. This payment will be made through conversation between the two. If you want to add something simple, you don't have to pay me for life.

Agreement & Signatures

Both the Client and Developer agree to the project scope, timeline, and payment structure as described above.

Client Signature: _____

Developer Signature: Mozammel Hosen
